or Waring says) is a Gera little money; then rented a farm's shear, "then he bought it; and now mud, warch \$20,000. He is strious; naver sceme in a hurry sys shoud with his work. You e him at church Sundays, and his farm week days. He raises a duany calves, and when I was only mough funking he had his core in the and the stalks in the bare, and send of young cattle on the stub-cking up the leaves and scattered cars. He has colarged and re-shingled the old barn, given it a cont of paint, put on gutters, and conducted the water into a large cistern. His fonces are in perfect order. The whole farm, garden and orehand is a pattern of neatness and thrift. No water stands on his low land; no weeds go to seed on his pastures. His back lot, adjoining the woods, was covered with partially decayed stumps, brambles and words. He set fire to the stumps, cleared the land, summer fallowed it, and sowed it to Diehl wheat and got (this year) forty bushels per acre. And it is now in wheat again, and is probably good for over thirty bushels next harvest. Everything he does prospers. He is a "lucky" man-that is, be has good sense, and has health, errenath, energy and industry to use it .- Rural Carolinian.

Ayer's Ague Cure,

scimowledgments we receive of the radical cures effected in obstinate cases, and where other remedies had wholly failed.

Unacclimated persons, either resident in, or travelling through miasmatic localities, will be protected by taking the AGUE CURE daily.

For Ever Complaints, arising from torpidity of the Liver, it is an excellent remedy, stimalating the Liver into healthy activity.

For Billious Disorders and Liver Complaints, it is an excellent remedy, producing many truly remarkable cures, where other medicines had failed.

Prepared by Dr. J. C. ATER & Co., Practical and Analytical Chemists, Lowell, Mass., and sold all round the world.

Ayer's Ague Cure,

For Fever and Ague, Intermittent Fever,

Chill Fever, Remittent Fever, Dumb Ague, Periodical or Bilious Fever, &c., and indeed all the affections which arise from malarious, marsh, or miasmatic

No one remedy is louder called for by the necessities of the American people than a sure and safe cure for Fever and Agne. Such we are now enabled to offers with a perfect the disease, and with assurance, founded on proof, that no harm can arise from its use in any quantity.

That which protects from or prevents this discorder must be of immense service in the communities where it prevails. Precention is better than cure, for the patient escapes the risk which he must run in violent attacks of this baleful distemper. This "Cure" expels the missmatic poison of FEVER AND AOUE from the system, and prevents the development of the disease, if taken on the first approach of its premonitory symptoms. It is not only the best remedy ever yet discovered for this class of complaints, but also the cheapest. The herge quantity we supply for a dollar brings it within the reach of severybody; and in billous districts, where FEVER AND AGUE prevails, everybody should have it, and use it freely, both for cure and presection. It is hoped this price will place it within the reach of all—the poor as well as the rich. A great superiority of this remedy over any other ever discovered for the speedy and certain cure of Intermittents is, that it contains no Quinism or other injurious effects whatever upon

quinism or other injurious effects whatever upon the constitution. Those cared by it are left as healthy as if they had never had the disease. Fever and Ague is not alone the consequence of the miasmatic poison. A great wasterness.

THE DARRY .- Let everything about the dairy be done with unvarying regularity and scrupulous cleanliness Tolerate no noise, harsh words or rough treatment. Never hurry or run the cows, or excite them in any way. Milk with a steady, unceasing flow, and leave not a drop in the udder. Next to liberal feed, pure water and clean milking, we place in importance, petting the cows. A dairy farmer must be a gentleman And the cows like to see a kind hearted, sensible woman in the yard or stable at milking time ! Let every dairy utensil be scalded every day. Mere washing in warm water will not answer. The water must be builting hot. Nearly all the trouble of the butter not coming bad flavor, etc., arises from ignorance or inattention to the necessity of having the water boiling hot. A dirty vessel dipped in boiling water for a moment or two is far better than one that has been washed perfectly clean in merely warm water, but not scalded. The hot water penetrates into every pore or crack, and dustroy the germs of the fungus that produces the mischief.

TOMATOES-The secret of raising large and smooth tomatoes-it being unod that the seed of the best selec ted stock is imperative-lies in giving them an abundant supply of water-not so much during the early growth of the plant, but especially during the ripeuing of the fruit, and in keeping the soil about them thoroughly stirred. Hoe the ground every morning, and water every evening -after the sun goes down.

FATAL POISONING BY CATERPIL A.ARS. — The Trenton (Tenn.) News hears that five persons have died in Skullbone, Gibson County, in consequence of eating fish caught in a river into which caterpillars had tallen and boss swallowed by the fish. Also, that an infant while crawling on the floor picked up a caterpillar, and before its mother could prevent it, swallowed it, from which the childhated in less than two hours. The family, to test whether cat erpillars were poisonous put one in some dough and gave it to a dog, which also died in a few hours.

Fever and Ague is not alone the consequence of the masmale poison. A great variety of disorders arise from its irritation, among which are Neuralpia, Rheumatism, Gout, Headache, Elindness, Foothache, Earache, Catarth, Asthma, Palpitation, Painful Affection of the Splean, Hysterics, Pain in the Bowels, Colic, Paralysis, and derangement of the Stomach, all of which, when originating in this cause, put on the intermittent type, or become periodical. This "CUIRE" expels the poison from the blood, and consequently cures them all alike. It is an invaluable protection to immigrants and persons travelling or temporarily residing in the malarious districts. If taken occasionally or daily while exposed to the infection, that will be excreted from the system, and cannot accumulate in sufficient quantity to ripen into disease. Hence it is even more valuable for protection than cure; and few will ever suffer from Intermittents if they avail themselves of the protection this remedy affords.

Scurf, Discolorations of the Skin, Humors and Diseases of the Skin, of whatever name or nature, are literally dug up and carried out of the system in a short time by the use of these Bitters. One bottle in such cases will convince the most incredulous of their cura tive effects.

Cleanse the Vitiated Blood whenever you find its im parities bursting through the skin in Pimples, Erup-tions or Sores; cleanse it when you find it obstructed and sluggish in the veins; cleanse it when it is foul and your feelings will tell you when. Keep the blood pure, and the health of the system will follow. Fin, Tape, and other Worms, lurking in the Fig. Tape, and other Worms, lurking in the spatem of so many thousands, are effectually destroyed and removed. Says a distinguished physiologist, there is scarcely an individual upon the face of the earth whose body is exempt from the presence of worms. It is not upon the healthy elements of the body that worms exist, but upon the diseased humor and silmy deposite that breed these living monaters of desse. We say that the end of the end of the limits will free the system from worms like those Bitlers.

WACCHUNG HANCASTER COURTY, S. C. To P. P. Zuntherman, Esq., Secretary of the Fair of the Carolinas, Charlotte, N. C. :

The following is a correct statement of Cotton raised by Stevens & Cureten, on 12 acres of stubble land, which was manured with 400 pounds of Carolina Pertilizer. The following is the mode of cultivation: It was the property broken up 12 inches down thoroughly broken up 12 inches deep and haid off in rows 31 feet wide, and the Festilizer applied in the drill, then bedded on it on the 15th of May, and planted the abuse day, but owing to the cool and dry weather, did not come up to a stand until about the lat of June. First working it was the around with a half shovel and partially trimmed out with a hose. Navents trimmed out with a hoe. Second worming it was run abound with a 8 inch grub, 13 inoties ling, and the middles thrown out with a sweep 18 inches wide. One furrow to a row and thinned to westand with a hoe abo 12 inches between the steeke, and afterwards it was givingled every two seeks with a swoop 16 inches wide, and hed cash time, until it was worked five times.
